

Easy & Safe! Sinus solution proposed by Advisory Committee member of MegaGen Implant

Advanced Sinus Solution

- Improved perforation stability + instant bone grafting
- Simple & safe hydraulic lift with 1mm step-by-step stoppers
- Precise elevation, even with minimal window opening
- Diamond drill & bone carrier exclusively for lateral approach

Simple surgery concept

MICA Kit

- Crestal Approach Sinus kit, Advanced!

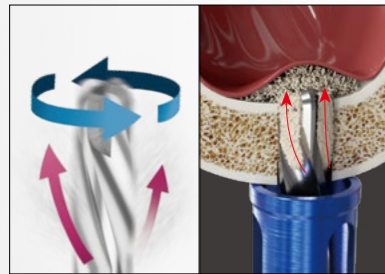

Multifunctional,
Hybrid Flute

Advanced CASA Drill

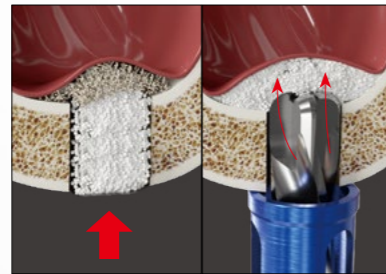

Improved perforation stability + instant bone grafting

Safe bone shield

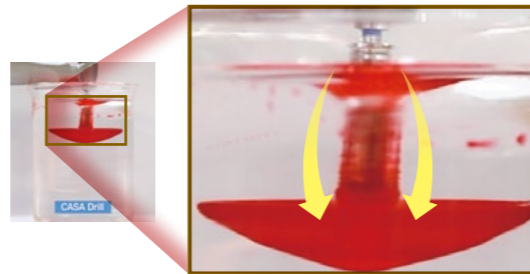

When drilling, bone chips are expelled towards the sinus floor, significantly reducing the risk of membrane perforation.

Bone graft lifting

With a low speed, bone graft lifting can be performed without any additional instruments.

Hybrid flute test

CASA Drill

Minimalized window concept

MILA Kit

- Lateral Approach Sinus kit, Advanced!

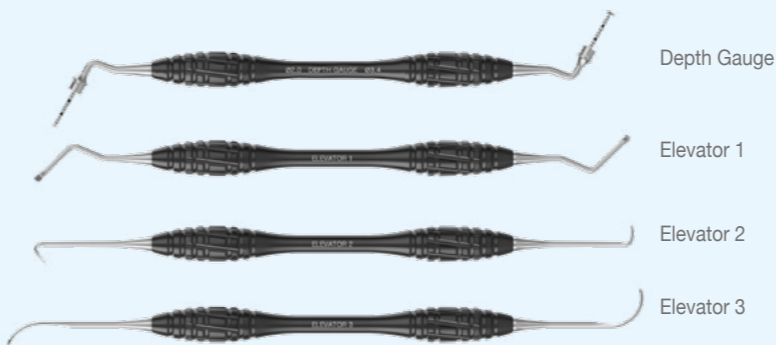

Advanced Sinus Elevator

Precise control, even with minimal window space

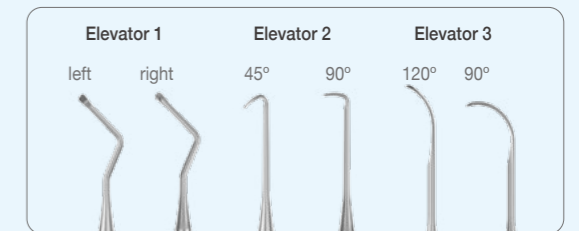

The ergonomic design of the Master Grip is optimized for a lateral approach to enable meticulous and precise finger control even with a minimized window.

Precise Control,
Master Grip

Tips for step-by-step use in various environments to enable safe membrane lifting.

Advanced Aqua Lifter (coming soon)

Simple & safe hydraulic lift

Since a hydraulic sinus lift procedure must be completely sterile, MegaGen's single-use Aqua Lifter completely eliminates any source of instrument contamination, plus it connects directly to the syringe (no silicon tube connection), making it easy and convenient to use.

*Specialty item

Advanced Drill Stopper

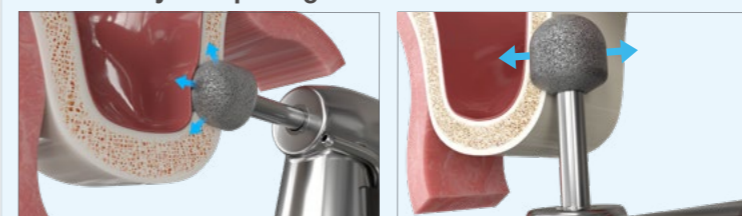

Delicate depth adjustment in 1mm increments

11 stoppers with safe 1mm step-by-step increments from 2 - 12mm to accommodate a wide range of cases.

Advanced Diamond Drill

Safe & easy for opening lateral wall

Ø6.5 diamond drill for easy and safe formation of a minimal window.

Designed to facilitate lateral cutting, making it easy to use, even in hard-to-reach situations.

Easy Bone Carrier

Instant supply of large quantity of bone graft material

Specially designed for bone grafting with a minimized window to enable the instant transfer of a large quantity of bone graft material.
